PROFESSIONAL SUMMARY

Computer Science student specializing in full-stack development with experience building AI-powered and scalable web applications using React, Next.js, TypeScript, Flask, PostgreSQL, MongoDB, and TensorFlow. Developed projects in computer vision and financial automation, and contributed to open-source software through merged pull requests.

EDUCATION

Sahyadri College of Engineering and Management	Mangalore, India
Bachelor of Engineering in Computer Science — CGPA: 8.67/10	Sep 2023 – May 2027
Yenepoya PU College	Mangalore, India
Higher Secondary Education	Jun 2020 – May 2022

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS
Backend: Node.js, Express, Flask, MongoDB, PostgreSQL, FastAPI
Tools: Git, Docker, AWS, Postman, NPM, VS Code, PyCharm, IntelliJ, Resend, Clerk, Inngest
Libraries: Prisma, Pandas, NumPy, OpenCV, TensorFlow

WORK EXPERIENCE

Frontend Intern	Sep 2024 – Oct 2024
Joy Technology	
- Designed and implemented responsive web pages using Bubble.io, ensuring consistent functionality across all devices. - Customized UI/UX components to enhance navigation flow and improve user engagement. - Collaborated with developers to debug workflows and optimize page performance, achieving faster load times and smoother interactions.	
Open Source Contributor	Sept 2025
GitHub	
- Contributed merged pull requests to Flexile and Kana Dojo open-source projects. - Implemented and merged the Shinsei dark theme and a truncate feature, enhancing UI customization, accessibility, and user experience.	

PROJECTS

FreshWay – AI-Powered Fish Freshness Assessment & Marketplace	GitHub
- Built an AI-powered fish freshness assessment and marketplace platform using Next.js, React, TypeScript, Flask, MongoDB, and TensorFlow. - Designed a hybrid ensemble pipeline combining MobileNetV2 CNN, OpenCV-based expert rules, and multi-view inference for robust freshness grading. - Integrated Roboflow API, geolocation-based buyer matching, NextAuth authentication, real-time messaging, and marketplace deal management.	
Attendo – AI-Powered Smart Classroom Attendance System	GitHub
- Built a real-time smart attendance management platform using FastAPI, React, Tailwind CSS, and MongoDB to streamline classroom attendance tracking and administration. - Developed an AI-powered multi-face recognition pipeline using DeepFace, RetinaFace, FaceNet512 embeddings, and cosine-similarity matching to identify multiple students from a single classroom image. - Integrated Telegram Bot API notifications and implemented a secure JWT-authenticated admin dashboard featuring attendance analytics, class-level filtering, and CSV report exports.	
FinWise – Personal Finance Management Platform	GitHub
- Built a full-stack personal finance management platform using Next.js, React, PostgreSQL, and Prisma ORM. - Implemented AI-powered receipt scanning using Google Gemini for automated expense categorization and financial tracking. - Integrated Clerk authentication, Inngest workflows, Resend notifications, and Arcjet security for alerts, recurring transactions, and reports.
